CTAD 2021 Lifetime Achievement Award

This year the Lifetime Achievement Award in Alzheimer's Disease Therapeutic Research is awarded to Ron Petersen, MD, Ph.D., in recognition for his extensive contributions to the advancement of AD clinical trials.

Ronald C. Petersen, MD, PhD - Professor of Neurology and Director of the Mayo Alzheimer's Disease Research Center, Mayo Clinic, Rochester, MN (USA).

Dr. Ronald C. Petersen received a Ph.D. from the University of Minnesota and graduated from Mayo Medical School in 1980. He completed an internship in Medicine at Stanford University Medical Center and returned to the Mayo Clinic to complete a residency in Neurology. That was followed by a fellowship in Behavioral Neurology at Harvard University Medical School/Beth Israel Hospital in Boston, Massachusetts. Dr. Petersen was named the Cora Kanow Professor of Alzheimer's Disease Research and Mayo Clinic Distinguished Investigator in 2011. He is currently the Director of the Mayo Alzheimer's Disease Research Center and the Mayo Clinic Study of Aging and has authored over 1000 peer-reviewed articles on memory disorders, aging, and Alzheimer's disease. Dr. Petersen has received the 2004 MetLife Award for Medical Research in Alzheimer's Disease and the 2005 Potamkin Prize for Research in Picks, Alzheimer's and Related Disorders of the American Academy of Neurology. In 2012 he received the Khachaturian Award and the Henry Wisniewski Lifetime Achievement Award in 2013 from the Alzheimer's Association. In 2011 he was appointed by the Secretary of Health and Human Services to serve as the Chair of the Advisory Committee on Research, Care and Services for the National Alzheimer's Disease Plan.

Keynotes

“Anti-Tau Drug Development for Alzheimer’s Disease and Other Tauopathies”

Adam Boxer, MD, PhD

Endowed Professor in Memory and Aging, University of California, San Francisco (UCSF), USA

Dr. Boxer directs UCSF’s Neurosciences Clinical Research Unit and the Alzheimer’s Disease and Frontotemporal Degeneration (FTD) Clinical Trials Program at the UCSF Memory and Aging Center. Dr. Boxer’s research is focused on developing new treatments and biomarkers for neurodegenerative diseases, particularly those involving tau and TDP-43. Dr. Boxer received his medical and doctorate degrees as part of the NIH-funded Medical Scientist Training Program at New York University Medical Center. He completed an internship in Internal Medicine at California Pacific Medical Center, a residency in Neurology at Stanford University Medical Center, followed by a fellowship in behavioral neurology at UCSF. He is the principal investigator (PI) of the **Advancing Research and Treatment for FTLD (ARTFL)** Rare Disease Clinical Research Consortium, a collaborative project funded by the National Institutes of Health to create an 18-center North American research network to support the development of new therapies for FTLD. He also leads the **Four Repeat Tauopathy Neuroimaging Initiative (4RTNI)**, a multicenter, longitudinal tau PET and biomarker study focused on PSP and CBD.

“Vascular Risk Factors and Alzheimer’s Disease: Implications for Clinical Trials”

Cynthia Carlsson, MD, MS

Professor in Alzheimer’s Disease, Division of Geriatrics and Gerontology, University of Wisconsin, Madison, WI (USA)

Dr. Carlsson is a geriatrician at the William S. Middleton Memorial Veterans Hospital in Madison, Wisconsin, where she treats veterans with dementia and memory issues. She is the Clinical Core leader and a co-leader for the Biomarker Core in the Wisconsin ADRC. She also serves as director of the Wisconsin Alzheimer’s Institute. Dr. Carlsson’s research focuses on the effects of vascular risk factors and their treatments on cognition and biomarkers for Alzheimer’s disease in persons at risk for dementia. Vascular risk factors in midlife, such as high cholesterol and elevated blood pressure, have been associated with an increased risk of developing Alzheimer’s disease decades later. It is unknown, however, whether treating vascular risk factors will reduce the risk of dementia.

Keynotes

“Biostatistics in Alzheimer’s Disease Therapeutic Trials: A Future of Convergence”

Rema Raman, PhD

Professor of Neurology, Keck School of Medicine, University of Southern California and Director of Biostatistics at USC Alzheimer Therapeutic Research Institute, San Diego, CA (USA)

Rema Raman is a Professor of Neurology at the University of Southern California (USC) and the Director of Biostatistics at USC’s Alzheimer’s Therapeutic Research Institute. She also serves as the Biostatistics Unit lead and Recruitment Unit co-lead for the National Institute of Health funded Alzheimer Clinical Trials Consortium. Dr. Raman has extensive experience as a biostatistician and clinical trialist, providing biostatistics and data management leadership and support to the design, coordination, conduct and analyses of clinical trials in Alzheimer’s disease, acute stroke, post-traumatic stress disorder, and traumatic brain injury. Her statistical research interests are in efficient clinical trial design and analysis, centralized statistical monitoring and data visualization, recruitment and retention and missing and longitudinal data analysis topics. Dr. Raman is committed to the effective teaching of biostatistics and clinical trial methodology and is the co-director of the National Institute on Aging and Alzheimer’s Association funded Institute of Methods and Protocols for Advancement of Clinical Trials in ADRD (IMPACT-AD).
